“What You Think, You Become.”

- Lord Buddha

It's been around two and half decades now since I set on this journey in the education field as a mentor, educator, and it had always been my long cherished dream to provide a springboard to the students of our region in the form of a right institute so that they can catapult themselves to dizzy heights in their academics and realize their dreams of getting into the esteemed and coveted professions like engineers and doctors.

And this long cherished dream got realized in the form of Inspire in 2014. And in just five years, we've been able to make our presence strongly felt in the region as an absolute leader in the IIT and medical entrance training . A year after year, we at Inspire are coming up with far more exciting results at par with the best coaching institutes in the country.

With the sky high ideals and the commitment to excellence, we welcome you here at Inspire to help you achieve your child's dream of becoming the most celebrated and coveted professional with the help of Midas touch at Inspire.

Strategy towards success

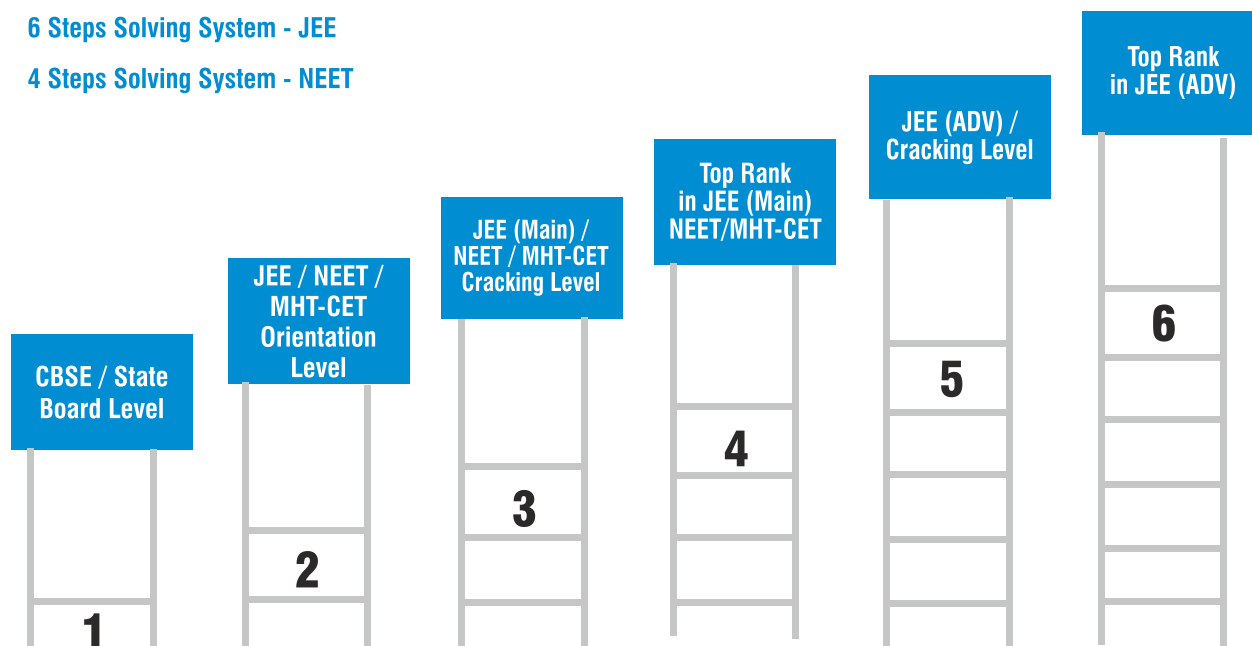

The ultimate success in JEE / NEET depends on the problem solving practice. Inspire has evolved the strategy for the success; it consists of step-by-step solving practice. We have divided solving sessions in three broad groups A) Subjective type-elementary level, B) Objective Type & C) Mix type-advanced level. Each group is further divided in to two steps each, thus taking total to six steps.

- 1 Step 1** is the lowest board level solving, directly from board books. This step ensures success in the board exam.
- 2 Step 2** is selected problems from other books / Daily Practice Problem Sheets (DPPs). This takes students to higher-than-board level & orients them to MHT-CET / JEE / NEET.
- 3 Step 3** consist of selected objective problems & is sufficient to take students to MHT-CET / JEE (Main) / NEET cracking level.
- 4 Step 4** is solving many more objective problems & it ensures good rank in MHT-CET / JEE (Main) / NEET.
- 5 Step 5** is mix type questions based on JEE (Advanced) pattern and takes students to JEE (Advanced).
- 6 Step 6** is still higher level mix type problems & ensures good rank in JEE (Advanced)

Students must solve problems step-wise. If the jump to higher step directly then they will be wasting more time unnecessarily and will not be able to answer simple questions in the exam.

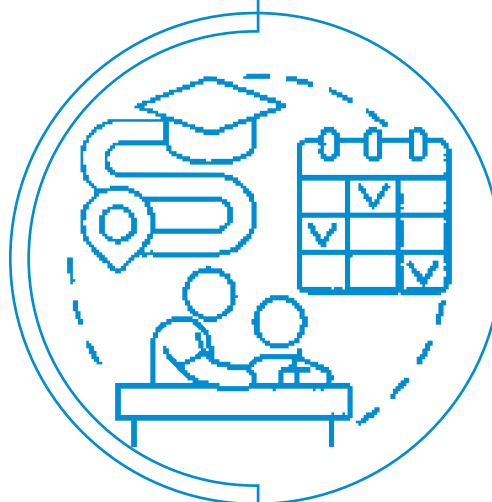

6 Steps Solving System - JEE

4 Steps Solving System - NEET
